## melmac - "les secours arrivent et prennent le relais"

this is melmac's first long-length album where we can hear a collaboration with the band Transmission Six (with members of the Walkabouts and Williard Grant Conspiracy). This record allows the band to focus on more melodic compositions, based on less abstract structures. Melmac's samples are created from original instruments (like thumb piano, gamelan, steel drum) that open new horizons to their so unique musical world.
